

The 8th Kiyosu City Haruhi Painting Triennale

Competition Information

The city of Kiyosu is a suburb of Nagoya city in the center of Japan. Kiyosu has a lot of history such as the site of Kiyosu Castle and is built as an environmental city with safety, comfort and creativity in mind along the waters of the Shonai and Gojo rivers.

One of the aims of the city is to raise the cultural awareness of its citizens and foster exceptional people for the next generation, to which we open the Kiyosu City Haruhi Painting Triennale.

This will be the eight opening, and has become one of the known competitions around Japan. Many of the past entrants have used this as a starting point for careers in Japan and abroad.

With many types and styles to express in these days, we welcome works from around the world and encourage the creators of art that can be framed and hung to see how much they can do, and wish to enrich the hearts of the friend of art.
